Rafiki is a Czech brand whose story had begun long before it even got its name and the first T-shirt was made. Still, it was always with us back then – when we were getting pumped on long rock lines, while projecting the routes on difficult bouldering sequences, on a wobbly slackline, and when sitting by the fire with a bunch of friends in the evenings.

Rafiki's brand philosophy is like climbing a rock route when everyone must find their own unique way to approach it. Rafiki means "friend" and Rafiki's mission is to support each of you in finding your own path. Perhaps that's why the brand has quickly found fans among climbers and all those who feel the same way about the world.

#RAFIKICLIMBING

MARTINA DEMMEL GYM SESSION TRIP TO SPAIN

RAFIKI AMBASSADORS

Our ambassadors include experienced climbers as well as interesting personalities and promising aces.

The most prominent members of the team are:

leading German climber **Martina Demmel**, who climbs 9a routes,
Štěpán Volf, who is constantly trying and inventing new difficult projects in the Moravian Karst,
Vojta Trojan, a tireless rock climber and competitor,
Kuba Konečný, who has climbed various routes up to a 9a+ grade,
leading Belgian boulderer **Rob Dennayer** or Spanish climber **Núria Díaz**.

All of them, and dozens of others, give us feedback that is incredibly important for our work and we take into consideration when creating new collections.

#RAFIKITEAM

RAFIKI URBAN BOULDER RACE PRAGUE

RAFIKI COOPERATIONS

For a long time, we have been supporting exciting and often unique climbing events such as the Rafiki Water Boulder Games, the Rafiki Urban Boulder Race and other climbing competitions and festivals. We are very happy about the success of the Czech Mountaineering Association's youth climbing team that we have been supporting for years.

RAFIKI DISTRIBUTION

Rafiki is no longer just a local brand. You can bump into it while sipping coffee in the winding streets of Arco in Italy, when endlessly practising in the shady forests of Frankenjura in Germany, while improving your personal best in sunny Kalymnos, or when spending the winter climbing in far-away Spain.

COLOURS

DOWN

.. has been used for centuries as an insulation for garments where maximum warmth was required. Nothing has been developed that comes close to the warmth or sustainability of down. It also has the unique ability to retain its loft and performance for many, many years.

Rafiki brand uses 100% responsible sourced down with RDS certificate.

The Responsible Down Standard is promoted internationally by the Textile Exchange, provides for the release of an environmental declaration verified by a third party which ensures that down and feathers used for padding elements are obtained from aquatic birds (goose and duck) or terrestrial (e.g. chicken and turkey) that have not been subjected to treatments that cause pain, suffering or stress and that an identification and traceability system that applies to the origin of the material is applied and maintained.

ECO-EFFICIENT PERFORMANCE FIBER

.. is a polyester microfiber made of 37% plant-based component (corn glucose). It is soft, quick drying and moisture wicking, so it is a durable and responsible alternative to animal down.

LIGHTWEIGHT BREATHABLE WARMTH

Sorona® synthetic down insulation provides lightweight, exceptional resistance to heat loss with the added benefit of breathability.

LONG-LASTING SHAPE AND LOFT

Use it, wash it, then do it again. Sorona® synthetic down insulation maintains its shape and loft wash after wash, so you can look good and stay warm wear after wear, no matter where the day takes you.

SUPREME SOFTNESS

Live comfortably in every climate. Sorona® synthetic down insulation provides unparalleled softness that redefines how warmth should feel, so you can enjoy the outdoors in any season.

ECO-EFFICIENT PERFORMANCE FIBER

Sorona® is 37% plant based, using 30% less energy and emitting 50% less GHG (greenhouse gas) as compared to the production of nylon from non-renewable resources. In this day and age, that's a great look.

DUPONT SORONA STRETCH FIBRE

Sorona fibre's versatility and mechanical, long-lasting stretch makes it an excellent replacement for spandex

SPANDEX-FREE STRETCH SOLUTION THAT CAN BE RECYCLED

Sorona fabrics offer the perfect comfort stretch performance without breaking down over time due to heat, UV rays or chlorine exposure – meaning clothes continue to look, feel and perform great after each wear. This can lengthen the life of the garment for multiple uses and when it is finally time to retire the garment, it can be mechanically recycled rather than being directed to the landfill

.. push your performance even further. This soft and highly compressive fabric is the right balance between thermal insulation and breathability.

It's construction creates air pockets that keep body warmth in the fluffy fibres. For better breathability the mesh body releases excess heat during exercise. Polarstretch Loft is lightweight, packable and highly breathable.

The Polarstretch materials are hard-wearing, pliable and flexible in all directions as well as lightweight and easy to maintain. Polarstretch fabrics works best under a wind blocking layers. We suggest to use Polarstretch fabrics as a mid layer for intensive activities in cold conditions.

The world known brand stands for highly functional and top quality zippers ensuring comfort and reliability even during long-term use. YKK zippers are waterproof, windproof, highly durable, able to withstand extreme weather and therefore are frequently used in technical sports apparel.

<https://www.ykkfastening.com/products/zipper/>

THE GLOBAL ORGANIC TEXTILE STANDARD (GOTS)

.. is recognised as the world's leading processing standard for textiles made from organic fibres. It defines high-level environmental criteria along the entire organic textiles supply chain and requires compliance with social criteria as well.

Only textile products that contain a minimum of 70% organic fibres can become GOTS certified. All chemical inputs such as dyestuffs and auxiliaries used must meet certain environmental and toxicological criteria. The choice of accessories is limited in accordance with ecological aspects as well. A functional waste water treatment plant is mandatory for any wet-processing unit involved and all processors must comply with social criteria. The key criteria of GOTS, its quality assurance system and the principles of the review and revision procedure are summarised in this section.

<https://www.global-standard.org/>

INDIAN ORGANIC COTTON

.. is cotton that is produced and certified to organic agricultural standards. Its production sustains the health of soils, ecosystems and people by using natural processes rather than artificial inputs. Importantly organic cotton farming does not allow the use of toxic chemicals or GMOs (genetically modified organisms). Instead, it combines tradition, innovation and science to benefit the shared environment and promote a good quality of life for all involved.

**Reduces
environmental footprint**

**Promotes safe work
& better livelihoods**

HOW TO MEASURE

MEN

CHEST / Place the tape measure under the arms and around the fullest part of your chest with arms raised slightly.

WAIST / Measure all the way around your body, level with your belly button. Make sure it's not too tight and that it's straight, even at the back. Don't hold your breath while measuring.

HIPS / Put your feet together. Locate the correct area of your hips and measure the widest point around your buttocks. Hold the start of the tape measure on one hip, wrap it around your buttocks and around your other hip and then back to where you started.

INSEAM / Grab your favorite pair of pants. Measure the inseam starting at the crotch seam to the bottom of the pant leg.

SLEEVE LENGTH / Measure with your hands on your hips, from the neck edge, across your shoulder and down the outside of your arm to the wrist bone.

SLIM / FITTED
Fits close to the body
and form fitting.

STRAIGHT
Straight cut
through the body

RELAXED
Roomy and comfortable.
Drapes loosely on the body

WOMEN

HOW TO MEASURE

BUST / Place the tape measure under the arms and around the fullest part of your bust with arms raised slightly.

WAIST / Measure all the way around your body, level with your belly button. Make sure it's not too tight and that it's straight, even at the back. Don't hold your breath while measuring.

HIPS / Put your feet together. Locate the correct area of your hips and measure the widest point around your buttocks. Hold the start of the tape measure on one hip, wrap it around your buttocks and around your other hip and then back to where you started.

INSEAM / Grab your favorite pair of pants. Measure the inseam starting at the crotch seam to the bottom of the pant leg.

SLEEVE LENGTH / Measure with your hands on your hips, from the neck edge, across your shoulder and down the outside of your arm to the wrist bone.
